

FOR IMMEDIATE RELEASE

October 5, 2020

Xirgo® Technologies, LLC is Proud to Announce DCSA Compliance of our IOT Solutions
Xirgo's Transportation Asset Tracking Solutions Meets the DCSA Standards for Inoperability

CAMARILLO, Calif. - Xirgo® Technologies, LLC, a leading provider of innovative, full-featured, application-specific wireless IoT communication devices, is pleased to announce its full compliance with the nonprofit, Digital Container Shipping Association (DCSA). The importance of this announcement is that Xirgo's solutions will be able to work with a variety of assets in the shipping container industry. Xirgo is also one of the largest solution providers in the refrigerated container market for IoT devices.

Xirgo's VP of Solutions Architect William J Hurst said, "Xirgo is proud to be recognized by the DCSA. We are committed to being compliant with all the IoT standards outlined by the DCSA. Xirgo has a track record of bringing innovative solutions to this industry. This includes the ability to track and control refrigerated containers, dry containers, trailers, tractors, and gensets. We have over 12 years of experience creating solutions for this industry with well over half a million units deployed. We are a full solutions provider for these applications."

DCSA, an organization established in 2019, creates standards regulated by a renowned team of professionals with backgrounds in the shipping and technology industries. According to the DCSA, "With these standards in place, carriers and supply chain participants will be one step closer to providing customers with an uninterrupted flow of relevant information regarding the whereabouts of containers and the status of their contents at any point along the container journey."

Xirgo develops and deploys flexible IoT solutions to fit specific business needs. Xirgo's technology is used around the world to monitor and track the complete journey of a container. As a result, the device can determine the true shelf life of the shipped goods and provide a location record in case of theft and tampering. In addition to hardware, Xirgo offers a complete software toolset to manage, configure, control, and track devices.

About DCSA

Digital Container Shipping Association (DCSA) is a neutral, non-profit group founded by major ocean carriers to digitise and standardise the container shipping industry. With the mission of leading the industry towards systematic collaboration, DCSA drives initiatives to make container transportation services transparent, reliable, easy to use, secure and environmentally friendly. DCSA's open source standards are developed based on input from DCSA member carriers, industry stakeholders and technology experts from other industries. DCSA member carriers include: MSC, Maersk, CMA CGM, Hapag-Lloyd, ONE, Evergreen, Yang Ming, HMM and ZIM. Please download DCSA standards at dcsa.org
